

PEROXYBOOST

Description

Peroxyboost is an additive used for blending with Caustic Soda solutions. It is specifically designed to boost the detergency by supplying a source of active oxygen. When Peroxyboost is exposed to a hot temperature in a high pH environment it degrades to release Oxygen gas, this oxygen gas delivers mechanical action to the CIP

Benefits

- Enhances the performance of Caustic
- Enables enhanced cleaning with lower Caustic strengths
- Effective at removing beer stone
- Saves energy required for CIP
- Provides mechanical action to CIP

Application and Dosage Rates

ENSURE THAT THIS PRODUCT IS NEVER MIXED WITH CHLORINES AND AVOID PROLONGED CONTACT WITH RUBBER AND CONTACT WITH SOFT METALS, COPPER, ZINC, ALUMINIUM.

REFER TO THE SAFETY DATA SHEET BEFORE USING THIS PRODUCT.

ENSURE THAT THIS PRODUCT IS NOT MIXED WITH CHLORINE CONTAINING PRODUCTS OR FLAMMABLES AS IT IS A STRONG OXIDISING AGENT.

BREWERY USAGE

Add Peroxyboost to the caustic cycle of the CIP at a rate of 0.5 – 1.0 % of the total volume of the CIP set. For best results, add half of the Peroxyboost 1/3 of the way through the caustic cycle and the other half 2/3 of the way through the cycle.

Peroxyboost will only work with hot caustic as it requires high temperatures to catalyse the release of the oxygen gas.

Always ensure that when using Peroxyboost the CIP route or vessel is vented to avoid pressure build up from the O₂ gas produced.

For more information about how to use this product please contact a member of our technical team.

PRODUCT CODE

7216

PACKAGING

25 Litres

STORAGE

Store in original container.

Keep away from Chlorines and flammables.

Recommended storage temperature below 25 degrees C.

Store away from direct sunlight.

Do not allow to freeze.

SHELF LIFE

Use within 12 months from the date of manufacture.

REVISION NUMBER 001
REVISION DATE 10/02/2026
